

## Checklist

- 2 clipboards with waivers and signature sheets
- 2 buckets with sunscreen, wipes, bug spray, and hand sanitizer
- Bags
- Gloves
- Make sure you count how many people go out and make sure that same number comes back.
- Have people give the gloves back. I can run them through the washing machine at home.

## Announcements

- Focus areas to be pulled
- Watch the swans for danger signs of aggression and do not provoke. They have eggs on the nest and are very protective. Swans can be dangerous and have been known to try to drown people they see as a threat.
- Please wear pfd's.
- For areas where plants are mixed with hydrilla, break the stems off as close to the bottom as possible. Try not to disturb hydrilla. (show them hydrilla when you get out there and tell them to ask you if they think they see it but are unsure)
